BALL SPECIFICATION.

No. 2

HOME PRICE

7/3 per box of 6.

All our Balls bearing the brand L.T.F. comply with the I.L.T.F. specification which is also adopted by THE ENGLISH LAWN TENNIS ASSOCIATION.

Owing to preference for "hardness," the balls when boxed have a compression rather more than the maximum prescribed by the regulations and this extra compression is appreciated by players.

We were not concerned with the controversy between the Federation of British Manufacturers of Sports and Games and the Lawn Tennis Association regarding the "Official" Ball but we are very much concerned in providing all lawn tennis players with balls of the highest character at the lowest possible price.

Being actual manufacturers of balls from beginning to end (see Factory view at back) we are in an unique position to offer values unobtainable through channels absorbing two more profits before they reach the retailer.

The value of our balls is further increased by the fact that after one season's play they can be re-inflated (and washed), restoring their resiliency for a second season's use.

The cost of re-inflation is 1/6 for six balls, postage extra.

The L.T.F. brand is made in two grades.

**No. 1** has a covering of special wearing qualities for hard courts and, of course, is suitable for grass courts.

Six balls of this class have been used with satisfaction for over 1,000 games on a constructive hard court.

**No. 2** has a covering which wears very well on hard courts and will last for two or three seasons on grass courts.

These Balls can be re-inflated and their resiliency restored for the small cost of 1/6 for six balls, postage extra.

To ensure long wear, the covering is severely pressed in tightly fitting moulds nipping the end causing a slight ridge which is no detriment in play. Our first consideration is the character and this is followed by serviceability and economy.

... on the back and consequently not seen in this photograph.

**FALSE WEIGHT MARKING OF RACKETS**

There are thousands marked 13 and 13½-oz. which actually weigh 14-14½ or may be 15-ozs. Before buying a new racket ascertain the scale weight of your old one, and ask for that weight, never mind what it is marked. A racket weighing 14½-ozs. with the centre of gravity 12½-ins. from the end of handle feels lighter than a racket weighing 13½-ozs. with the centre of gravity 13½-ins. from the end of handle.

RACKETS SHOULD BE MARKED WITHIN ¼ OZ. OF SCALE WEIGHT.
