

(7). Lillians House with new wing.
The new wing is the portion with the
big chimney stalk coming towards
725 Ym in the picture. It was
just finished this summer + had
still for a very new look about
it outside but is very nice inside
& makes a big difference to the
place. There is a lovely view from
this front window looking out
to see - the view is the same as
in picture (2). August 1953
